Effort Level ☐1 ☐2 ☐3

Effort: each use costs 3 − Edge from the pool (min 0); uses per roll = Effort Level. Each buys +1 bonus die (before rolling) or +1 Power (after a success). Max +2 bonus dice, keep the best two. Running dry: a positive cost that empties a pool imposes a status at tier 1 + overrun. Only Resistance and imposed costs may overrun. Tier 6: Taken Out within scope and a Scar. Pools and statuses recover separately; no automatic refill (Core §6.1–6.5).

Rests today ☐1st ☐2nd ☐3rd ☐Full ☐Hardened

1st a few seconds (1 action) 1d12 ÷ 2 · 2nd 10 minutes 1d12 ÷ 2 + 1 · 3rd 1 hour 1d12 ÷ 2 + 2 (round halves up) · 4th 10 hours: all pools full, then the cycle resets. Split the points among the four pools, up to each maximum. Edge doesn't apply. Hardened (one-time Advance): +1 point per recovery roll.

Psychē Notice · Investigate · Lore · Tech · Medicine · Deceive
Pneuma Will · Persuade · Intimidate · Empathy · Arcana*
*Renamed per setting. A skill's default pool pays its Effort and Resistance; the GM may allow another pool when the fiction fits.

Roll 2d12 + Skill + Tags (max +2) ± Status vs. Difficulty: Easy 12 · Standard 15 · Hard 18 · Formidable 21 · Heroic 24. Truths shift Difficulty ±3 per rank (±9 max).
Meet it: Success, 1 Power (+1 per full 3 over). Miss by 1–3: Success at a Cost (a consequence or GM +1 Woe, your choice). Miss by 4+: Failure, GM +1 Woe.
Doubles: success +1 Power; failure or cost, a complication (buy off: GM +2 Woe). Double 12s: success, +2 Power. Double 1s: always a complication.
Bonus dice: Effort · Momentum (1, then 2) · give the GM 1 Woe · Help. Unspent Power → party Momentum (max 6).

Weakness tags · −1 each, no cap · compel for +1 Tychē

_____
_____
_____

Burn a power tag: +1 Power on a success, ignoring the cap. Recover it in downtime or at a milestone.

Tychē Points

Tychē _____ Refresh _____

Spend 1: Invoke (reroll all, or +2 after rolling) · Declare a minor fact · Resist harder (cost 0).
Earn: accept a meaningful compel on any tag, Belief or Instinct, or compel yourself (+1; refuse = pay 1) · your Belief costs you (1/session) · MVP vote (+1 next session).
Refresh base 3, minimum 1. Hold at most Refresh + 3.

Beliefs · Goals · Instincts

_____ ☐1 ☐2 ☐3 ☐4 ☐5 ☐6
_____ ☐1 ☐2 ☐3 ☐4 ☐5 ☐6
_____ ☐1 ☐2 ☐3 ☐4 ☐5 ☐6

Stacking: a new status of the same kind adds its tier − 1 (min +1). Tier 6: Taken Out. Apply only the highest harmful and highest helpful status. Record each status's scope and what ends it; it applies only within that scope.

Resist *roll 2 + Edge d12, keep the highest die*

Highest die	Two 12s	9–12	5–8	1–4
Cost	0 + clear a tier-1	1	2	3

Effect: the incoming status drops 2 tiers, or a severe consequence becomes a lesser one. Armour reduces physical harm further. Negative Edge: −1 rolls 1d12; −2 or lower rolls that many dice and keeps the lowest.

Scars *weakness tags · the 4th retires the character*

Armour ☐1 ☐2 ☐Damaged *(−1)* ☐Shield *+1 Defend*

Light armour (1 load) is Armour 1; heavy (2 load) is Armour 2 and Mētis Effort +1. When you Resist physical harm, reduce it by that many extra tiers. A tier-4+ hit damages armour until repaired in downtime.

Cyphers *Module A*

Cypher limit ☐2 ☐3

Cypher	Tier	Effects
_____		
_____		
_____		

Use: an action, usually no roll. It makes Power equal to its tier, spent only on its listed Effects. Over the limit: at scene end the GM gains 1 Woe per extra cypher and may roll Volatile (d12): 1–4 one fires · 5–8 one is ruined · 9–12 nothing yet.

BLED *physical injury from blood loss · Frontier §6*

BLED ☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5 ☐ 6 By _____

Tier	Effect
1	Pale and tired; no roll penalty. Clears after a full night's safe rest with food and water.
2	Light-headed: −1 on Sōma and Mētis rolls.
3	Weak: −2 on Sōma and Mētis rolls, and gain *Weary*.
4	Critical: −4 on Sōma and Mētis rolls. Unrelated harm does not automatically Take you Out.
5	Severe: −5 on Sōma and Mētis rolls. No Dying or death deadline from this tier alone.
6	Drained: Taken Out and a Scar. If lethal stakes allow, start the core 3-segment Dying clock; not immediate death.

Resist with Sōma when blood is taken. Listed penalties replace the normal tier penalty. Pools and Bled recover separately. Once blood loss stops: tier 1 clears after a full safe night with food/water; tiers 2–5 recover 1 tier per full safe day with care, food and water. Tier 6 needs definitive care. Stabilise: Medicine, Hard 18; stops the Dying clock, not Bled. Transfusion (willing donor and kit): Medicine, Standard 15; −1 Bled tier per Power; donor gains Bled-1. Explicitly bypasses the ordinary 1-tier treatment limit and *treated* restriction. Suitable transfusion can provide definitive care at tier 6; clear the clock when Bled drops below 6 and its immediate lethal cause ends. No pool refill or Scar removal.

DAY & NIGHT *every scene has a time Truth*

Day: direct sun gives vampires and dhampirs *Sun-Sick*; vampires keep indoors but aren't helpless. Dusk: GM +2 Woe; vampires come out. Night: vampires and dhampirs ignore darkness; +1 Woe per scene with a vampire present. Dawn: a vampire in direct light at the scene's end gains *Sun-Sick* 2. Hard to Kill: physical statuses normally stop at tier 5; specific exceptions apply. Sun-Sick 5 causes collapse, not ordinary broken activity. A vampire at Sun-Sick 5 left in direct sun for a full day reaches tier 6 and is destroyed by an automatic killing strike, with no roll or Dying clock (§7.1).

CAMPAIGN TRUTHS *agreed at session zero*

4 _____
5 _____

AFFLICTED BLOOD *dhampirs*

☐ This character has afflicted blood *(Carries Her Mother's Blood)*

SUN-SICK ☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5 ☐ 6

In direct sun under the Day Truth: +1 tier at the start of each outdoor scene (+2 under *Merciless Sun*). Penalty applies to Sōma and Mētis rolls. Resist with Sōma; a wide hat, dark cloak or partial shade is +1 Sōma Edge for that Resist. No dhampir healing while Sun-Sick. A full scene in shade or darkness removes 2 tiers; night clears it.
Normal cap: tier 5; ordinary gains and stacking cannot raise it further. Tier 5: collapse; Taken Out until carried into shade. Collapse alone causes no Scar or Dying.
Full-day exposure: a dhampir at tier 5 left in the sun for a full day advances to tier 6 and remains Taken Out. Record one Sōma Scar under core limits. Start the core 3-segment Dying clock only if established lethal stakes permit.
Rescue: removal from harmful sunlight stabilises sunlight-caused Dying without erasing marked segments, lowering Sun-Sick or restoring ordinary action. When shade/darkness recovery lowers Sun-Sick below 6 and harmful exposure has ended, clear that clock as definitive care. These provisions do not stabilise or clear Dying caused by another injury.
Recovery does not remove the Scar or restore pools or Disposition. Repeated exposure follows core Scar Recorded rules; renewed Dying before clock clearance resumes recorded segments. Ordinary Sun-Sick gains remain capped at 5. Full procedure: Frontier Rules §7.1; Core Rules §§6.3 and 6.7.

RESTRICTED STAKING EQUIVALENCE *Frontier §8.1*

Staked remains untiered: no actions or recovery while the stake remains. Solely for sustained fire, count the vampire as broken at physical status tier 5. For a subsequent killing-strike roll, reduce Difficulty by 15 or by 3 per tier of a higher actual negative status, never both; eligible killing-strike ability reductions still apply. No equivalence for staking rolls, other tests, status penalties, Blood Debt, recovery eligibility or ability triggers. Staking gives no automatic killing strike, Scar, Dying or destruction. Extra stakes add no benefit. Removing the stake ends the condition and both equivalences; actual statuses remain.
